SEVEN SINS. TWO HOURS. ONE LEADERSHIP MIRROR.

# Sometimes, It's Leadership.

---

Sometimes, the biggest threat to business growth isn't the market. It's not always your competitors. It's not always the economy. And it's not always your employees.

A business can have a brilliant strategy, talented people, great products and enormous opportunities — and still struggle because of leadership behaviours that quietly undermine growth, performance and culture.

## GOOD LEADERS CAN STILL DAMAGE GREAT BUSINESSES

Leadership decisions determine who stays and who leaves, what gets rewarded and what gets tolerated, how quickly decisions are made, how accountability works, and ultimately, how the business grows.

Small leadership behaviours repeated over time become organizational habits. Organizational habits become culture. And culture eventually shows up in performance.

## WHAT IS YOUR LEADERSHIP COSTING THE BUSINESS?

- Why do talented teams underperform?
- Why do high performers sometimes become disengaged?
- Why does accountability disappear as organizations grow?
- Why do leaders unknowingly create the very culture they complain about?

**"The dangerous part? Many leaders don't even know they are doing it."**

# What We'll Examine

---

We will examine the hidden leadership behaviours that influence:

## 01 BUSINESS GROWTH

How leadership can accelerate growth — or quietly become the bottleneck preventing the organization from reaching its next level.

## 02 PERFORMANCE

How leaders unintentionally weaken execution, ownership, accountability and the performance standards of their teams.

## 03 CULTURE

How everyday leadership decisions shape what people believe, what they tolerate, how they behave, and ultimately "how things are done around here."

## 04 PEOPLE

How leadership behaviours affect trust, engagement, retention, initiative and the willingness of great people to give their best.

## 05 EXECUTION

Why organizations can know exactly what needs to be done and still repeatedly fail to get it done.

THE QUESTION IS NOT "ARE YOU A GOOD LEADER?"

Could something you're doing as a leader be quietly working against everything you're trying to build?

There are 7 Deadly Sins of Leadership. Some are obvious. The most dangerous ones aren't.

**You may recognize the problem.**

**Will you recognize your role in it?**

This is an exclusive session for registered alumni of **SLAP** and **Managers That Manage**. A registration link has been sent to your email — only registered participants will receive Zoom access.
